

2026 Financial Proposal, Deployment Options & Rate Card

A flexible commercial framework for private schools, school groups and institutions - with cloud, private-cloud and perpetual on-premise options.

1. SCHOOL OS CLOUD

Recommended for most schools. REVTEK hosts, maintains and updates the platform. The school does not need to purchase an application server. Staff, parents and students access SCHOOL OS through approved web and mobile applications.

Plan	Price / Student / Term	Minimum / Term	Best for
CORE	₦1,250	₦300,000	Administration, academics and core digitisation
COMPLETE	₦2,000	₦450,000	Full parent, finance and operations platform
SECURE	₦2,750	₦650,000	Transport, safe pickup and security workflows
ENTERPRISE	Custom	Custom	Multi-campus, custom integrations and bespoke workflows

Package scope

- CORE: Admissions, student information, attendance, timetable, academics, examinations/results, student-linked fee management, communications and web administration.
- COMPLETE: Everything in Core plus Parent/Student/Teacher/Admin mobile experiences, advanced student-linked finance, HR, library/assets, richer reporting and analytics.
- SECURE: Everything in Complete plus authorised pickup, visitor management, bus/GPS software layer, geofencing, incident workflows and CCTV/security integration layer.
- ENTERPRISE: Multi-campus controls, SSO/API integrations, custom modules, advanced analytics and dedicated implementation/support design.

Implementation & optional services

Item	Commercial guide
Core implementation, configuration & training	₦250,000
Complete implementation, data migration & training	₦350,000
Secure implementation, workflow design & training	₦500,000
Custom integration / API work	From ₦250,000 per integration
CCTV, GPS, biometrics, access hardware & installation	Quoted separately
Payment gateway / card / bank transaction charges	Passed through at provider rate

2. PRIVATE CLOUD & ENTERPRISE DEPLOYMENT

For institutions that require dedicated infrastructure, enhanced isolation or local infrastructure control.

Deployment	Where SCHOOL OS runs	Commercial model	Management
REVTEK Cloud	REVTEK-managed cloud	Per-student subscription	REVTEK
Private Cloud	Dedicated cloud instance for one school/group	Subscription + dedicated hosting	REVTEK
Enterprise On-Premise	School-owned server / approved data centre	Perpetual software licence	School owns hardware; REVTEK deploys/supports

SCHOOL OS Private Cloud

The institution receives an isolated SCHOOL OS environment with dedicated database/resources and managed backups, while REVTEK remains responsible for hosting, patching, monitoring and platform maintenance.

Component	Commercial guide
Software licence	Same package pricing as SCHOOL OS Cloud
Dedicated hosting & management	Typically ₦750,000 - ₦1,500,000 per year, subject to size, storage and SLA
Dedicated SLA / special retention / extra storage	Quoted to requirement

SCHOOL OS Enterprise - Perpetual Licence

A perpetual licence provides a permanent right to use the licensed SCHOOL OS version for the agreed institution and licensed student band. REVTEK retains all source code, intellectual property and product ownership. Hosting, future major-version upgrades and ongoing support are governed separately.

Licensed student band	COMPLETE - Perpetual	SECURE - Commercial guide
Up to 300 students	₦7,500,000	Typically Complete + 30%
301 - 500	₦10,000,000	Typically Complete + 30%
501 - 750	₦14,000,000	Typically Complete + 30%
751 - 1,000	₦17,000,000	Typically Complete + 30%
1,001 - 1,500	₦22,000,000	Typically Complete + 30%
1,501 - 2,500	₦28,000,000	Typically Complete + 30%
2,500+ / multi-campus	Custom Enterprise	Custom Enterprise

Software Assurance	Policy
Year 1	Included
Year 2 onward	Optional - 18% of original software licence price per year
Without active Assurance	Licensed version continues to operate; updates, new features and priority support are excluded
Major-version upgrade without active Assurance	Quoted separately as an upgrade licence

3. ON-PREMISE, PROMOTIONAL PRICING & COMMERCIAL TERMS

Clear infrastructure responsibility, flexible commercial terms and promotional institutional incentives.

On-premise infrastructure responsibility

For a perpetual/on-premise deployment, the institution normally purchases and owns the server and local infrastructure. REVTEK provides the recommended specification and performs the agreed installation, database setup, security configuration, backup configuration, SCHOOL OS deployment and integration.

Item	Responsibility / treatment
Application server, UPS, NAS/backup storage, network equipment	Purchased/owned by institution, or supplied by REVTEK under a separate turnkey quotation
Server OS, database & SCHOOL OS deployment	Installed/configured by REVTEK within agreed scope
CCTV cameras/NVR, biometrics, GPS devices, access-control equipment	Quoted separately where required; compatible existing equipment may be integrated
External parent/mobile access	Secure public access or hybrid cloud gateway may be required; architecture confirmed during assessment
Hardware faults after warranty	Institution/hardware-vendor responsibility unless covered by a separate REVTEK support agreement

Promotional Institutional Pricing

REVTEK may extend promotional pricing and implementation incentives to qualifying institutions based on deployment scope, student population, contract duration, implementation schedule, number of campuses and other commercial considerations.

Plan	Promotional Price / Student / Term	Minimum / Term	Rate protection
CORE	₦1,000	₦250,000	Up to 24 months*
COMPLETE	₦1,500	₦375,000	Up to 24 months*
SECURE	₦2,000	₦500,000	Up to 24 months*

*Subject to the terms stated in the institution-specific quotation or agreement.

Commercial Flexibility & Negotiation

The figures in this rate card are commercial guide prices and are not cast in stone. REVTEK welcomes reasonable commercial negotiation and may tailor pricing, payment structure, package mix and implementation scope based on student population, selected modules, deployment model, contract duration, campuses, implementation complexity, prepayment, strategic relationship and other mutually agreed factors.

Any discount, promotional concession or revised commercial term becomes valid only when documented in a formal REVTEK quotation, proposal or signed agreement. The final institution-specific written proposal supersedes this general rate card.

General commercial terms

Cloud subscriptions are normally contracted for 12 months and billed termly in advance unless otherwise agreed. Perpetual pricing depends on the licensed student band and selected modules. Hardware, third-party licences, payment-gateway fees, communication charges and bespoke integrations are excluded unless expressly stated. Final technical scope is confirmed following a SCHOOL OS Operations & Safety Assessment.
